

How to Make a Fortune Teller

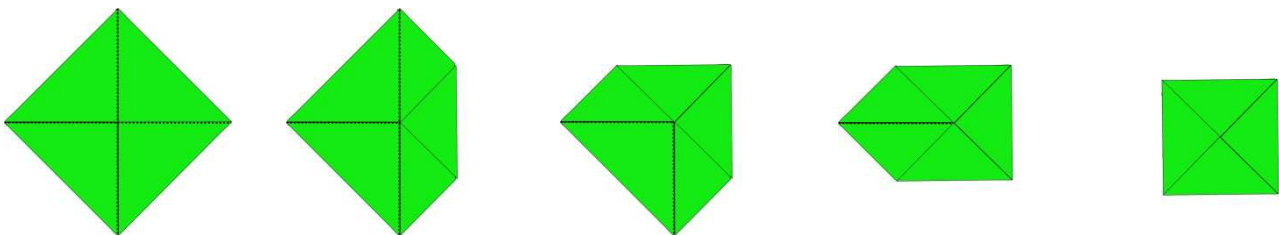

Starting with a square piece of paper, fold the opposite corners over so that the creases form a cross.

Fold each of the four corners in to the centre.

Turn the paper over and then again fold the corners into the centre.

Turn the paper over and slip your fingers under the flaps and close them together to form the fortune teller.

Now it is time to write on your fortune teller. Draw colour dots or shapes on the flaps. Turn it over so that you are writing numbers on the inside triangles. Open out the leaf and write your predictions or comments in the lower triangles. Fold it back up and you are ready to start.
