

Hurricane Crossword

Melanie Martinez of the USA can consider herself a little unlucky after having lost five different houses to five different hurricanes.

Solve the crossword using the information below:

1. An imaginary circle around the Earth, halfway between the North and South Poles.
2. A powerful, rotating storm that forms over warm oceans near the equator in the Atlantic Ocean, the Caribbean Sea, or the eastern Pacific Ocean.
3. Hurricanes are classified using this measure on the Saffir-Simpson scale.
4. This means that a hurricane is possible in a given area within 36 hours.
5. This describes the time of year when most hurricanes occur.
6. When a hurricane first goes over land.
7. A rise in the ocean as the result of strong winds from a hurricane or other intense storm.
8. The warmest and central part of the storm.
9. How a hurricane starts.

You could also try to find out:

- which storms Melanie Martinez was affected by;
- what made losing the fifth house even worse;
- who else has been plagued by bad luck;
- when the naming of storms started;
- if a storm has been named after you!
