LO: To give reasons for classifying animals based on their similarities and differences.

Please go through the teaching powerpoint, reading each slide carefully.

Now imagine that a new zoo is going to open in your local area. You have been asked to sort and group the animals that will live in the zoo, so that similar species can be housed in enclosures near one another.

You will act as a taxonomist, so it is up to you to decide how to classify the animals and give reasons for your classification.

Look at the pictures of animals on your Zoo Animals List and use the Zoo Classification worksheet to sort and group the animals. I have included an example of the zoo classification to help you.

Good luck 😊
