

# Forest School Easter Garden

## Activity

Why not have a go at making your own miniature Easter Garden? You will need a small plastic or foil tray/container to make your Easter garden in.

Use some **natural materials** to enhance your gardens; this could be some flowers, grass, petals, dried flowers, small stones, pebbles etc. There are some lovely images online if you need some ideas.

Making an Easter Garden is a fun and easy way to explore more about what happened at the first Easter and why it is so important for Christians. Click on the link below to find out how to make an Easter garden and why there is a cross in it. Please send us your photos of your lovely gardens so we can share them on the website.
